Dear Sir/Madam

As the person probably most affected by this proposed extension, I must object to it's construction. I note from the notification that I cannot object on the grounds of loss in value of my property, or loss of view, however I feel that I must object on the basis that it will prejudice my quality of life and enjoyment of my property. I also must object on the basis of overlooking and overshadowing of my property which can apparently be considered.

The amount of light entering my living room window is only slightly restricted at present due to the gable end of the property in question, however the building of an extension as proposed will make this problem a serious one. The gable end of the extension will be less than 6 metres from my front window and will extend significantly on either side. The fact that it's a single storey doesn't make clear that it's a sloping roof and therefore effectively much higher.

Yours faithfully

Mr.D.Millar
